

In the AdventureWorks2014 database:

1. If necessary, start the SQL Server Agent.
2. Create a job called ServerJob that runs the following code every day at midday.

```
SET IDENTITY_INSERT [HumanResources].[Department] ON
insert into [HumanResources].[Department]([DepartmentID],[Name], [GroupName],
[ModifiedDate]) values(17,'CS','Computer Science',GETDATE())
SET IDENTITY_INSERT [HumanResources].[Department] OFF
```

3. Run the following code, and note the answer

```
select count(*) from [HumanResources].[Department]
```

4. Add a new alert that runs ServerJob when an error of severity 16 occurs.
5. Run the following code - this will generate an error of severity 16:

```
SELECT 1/0
```

6. Run the following code, and make sure that the new answer is different:

```
select count(*) from [HumanResources].[Department]
```
